## Nokia in Brief

Nokia is the world's largest manufacturer of mobile devices; a leader in equipment, services and solutions for network operators; and a driving force in bringing mobility to businesses. Nokia is about enhancing communication and exploring new ways to exchange information. In short, Nokia is about connecting people.

In 2005, Nokia's net sales totaled EUR 34.2 billion. The company has 15 manufacturing facilities in nine countries and research and development centers in 11 countries. At the end of 2005, Nokia employed approximately 58,900 people. Nokia is a broadly held company with listings on the Helsinki, Stockholm, Frankfurt and New York stock exchanges.

## Organization

Nokia comprises four business groups: Mobile Phones, Multimedia, Enterprise Solutions and Networks.

**Mobile Phones** connects people by providing expanding mobile voice and data capabilities across a wide range of mobile devices. We seek to put consumers first in our product-creation process and primarily target high-volume category sales.

**Multimedia** brings connected mobile multimedia experiences to consumers in the form of advanced mobile devices and applications. Our products give people the ability to create, access and consume multimedia, as well as share their experiences with others through a range of radio technologies.

**Enterprise Solutions** offers businesses and institutions a broad range of products and solutions, including enterprise-grade mobile devices, underlying security infrastructure, software and services. We also collaborate with other companies to provide fixed IP network security, mobilize corporate email, and extend corporate telephone systems to Nokia's mobile devices.

**Networks** provides network infrastructure, communications and networks service platforms, as well as professional services to operators and service providers. Networks focuses on the GSM family of radio technologies and aims at leadership in three areas: GSM, EDGE and 3G/WCDMA networks; core networks with increasing IP and multiaccess capabilities; and services.

Our business groups are supported by various horizontal entities:

**Customer and Market Operations** is responsible for marketing, sales, sourcing, manufacturing and logistics for mobile devices from Mobile Phones, Multimedia and Enterprise Solutions.

**Technology Platforms** is responsible for the competitiveness of Nokia's technology assets. The group supports Nokia's overall technology management and development by delivering leading technologies and well-defined platforms both to Nokia's business groups and to external customers.

**Nokia-wide horizontal units** drive and manage specific Nokia assets. They include brand and design, developer support, research and venturing, and business infrastructure.

**Corporate Functions** support Nokia's businesses with company-wide strategies and services.
